Right side microphone wearing

P/N: JPL-Agent 60-PB

SKU: 575-490-002

MSRP: **\$184.90**

Right side microphone wearing

Designed in the UK, Manufactured in Taiwan

Designed for the Modern Professional

The new JPL-Agent 60 has been developed for users who need outstanding audio performance without compromising on comfort or awareness of their surroundings.

Featuring innovative Air Speaker Technology, the JPL-Agent 60 delivers crystal-clear audio directly to the ear while avoiding the pressure and discomfort often associated with traditional headsets or bone conduction designs. The result is exceptional sound quality and a headset so light you'll forget you're wearing it.

Key Features

- Available in single or dual speaker neckband models, both with right side wearing microphone boom.
- Industry-first Quick Disconnect (QD) neckband headset for maximum flexibility.
- Innovative Air Speaker Technology provides superior audio directed to the ear.
- Comfortable alternative to bone conduction, reducing ear and bone fatigue.
- Ultra-lightweight design for outstanding all-day comfort.
- Surround Shield™ bi-directional noise-cancelling microphone effectively suppresses background noise, ensuring your voice is heard clearly—even in the busiest working environments.
- Flexible, easy-position microphone boom.
- Secure neckband design that remains stable while users are seated, standing or moving around.

Ideal for

- Dispatch and control centres
- Emergency services and mobile command units
- Contact centres
- Hybrid and home workers
- Warehousing and logistics
- Security operations
- Any environment where users need comfort, mobility and clear communication throughout the day
